

The policy of NSS is to encourage respect for the environment and the adoption of an environmentally responsible attitude in the fulfilment of business objectives when delivering the provision of specialist cleaning, maintenance services and plant hire to the commercial, industrial, retail and public property sectors. The pursuit of this policy requires NSS to focus attention upon the following key principles:

Environmental Legislation – NSS complies with all relevant environmental legislation, regulations, codes of practice, and other regulations to which it subscribes.

Management System – NSS has implemented a documented environmental management system. We have set environmental Objectives and targets and we monitor performance including risk to ensure our impacts on the environment are determined and where possible drive continual improvement.

Communication – NSS promotes awareness amongst employees (and where applicable sub-contractors) of the importance of environmental issues to the business, and the environmental impact of the business activities. This Policy is available to the public and stakeholders on request.

Resources and Materials – NSS will conserve resources and materials, and manage their use efficiently, through implementation of waste minimisation programmes, and by encouraging the use of recycled materials, where appropriate.

Operation of the Business

NSS operates the business efficiently, with due consideration for environmental, social and economic impacts and values, and our relative competitive position.

A high value is placed on the control and improvement of environmental performance, and the prevention of pollution. The environmental impact of significant changes to equipment or processes is assessed as part of the approval process.

Products - The Processing of the products & services that NSS supply include consideration of environmental impact throughout the product life cycle.
